

Post-Truth Populism: A New Political Paradigm

Editors: Saul Newman and Maximilian Conrad

WHAT ARE THE LINKS BETWEEN POPULISM & POST-TRUTH POLITICS?

CLASH OF PERSPECTIVES

1

Critical Complacency

- Tends to **downplay** the novelty and danger of post-truth, seeing it as part and parcel of democratic contestation.
- Sees “**hysteria**” over post-truth as an expression of elitist concerns about populist challenges.

Mainstream Alarmism

- Sees post-truth politics as a clear and present **danger** to the democratic way of life.
- Focuses on the **convergence** between post-truth and right-wing populism as an **authoritarian challenge** to pluralism, democratic procedure, the rule of law and respect for minority rights.

2

Is post-truth populism a new political paradigm?

YES

The link between post-truth politics and populism has to be taken seriously and explored systematically

BUT

Stay aware **of the dangers** of using allegations/accusations of “post-truth populism” simply as an easy way to discredit the potentially legitimate claims of (some) political actors.
